County Commission
Yankton County

RE: Approval of 2024 to 2028 Five-Year County Highway and Bridge Improvement Plan

I am pleased to inform you that your Five-Year County Highway and Bridge Improvement Plan is complete as submitted and is officially approved. A copy of the signed and dated Certification Form is attached for your records. Applications for the Bridge Improvement Grant Program can now be submitted for structures as listed in your approved Plan.

If you have any questions, please call me at 773-5243.

Sincerely,

A handwritten signature in blue ink, appearing to read "Colton Stahl". The signature is stylized with a large, looping "C" and a long, horizontal stroke extending to the right.

Colton Stahl

5 – Year Plan Public Meeting For 2024-2028

September 26, 2023

6:00 PM

Notes & Public Input

Wanda Fox, opened the meeting with the Pledge of Allegiance and roll call of the commissioners present. Wanda Fox, John Marquardt, and Dan Klimisch were present. Don Kettering, Commissioner Chair, and Ryan Heine were absent. There were no conflicts of interest by any commissioners. Wanda then opened the meeting for public comments. There were none and public comment was closed.

Road Improvements

- Mike, Yankton County Superintendent, began by telling the reason we do a 5-Year Plan. It is part of the requirements for applying for BIG grant money Yankton County uses to repair/replace bridges. He also said that the plan provides a guide for road repair and bridge repair/ replacement for the next few years.
- There were questions on the various road repair processes. Mike explained the different options and the costs associated with each. He also talked about the rotation from year to year between the processes. They are a step by step process. And need to follow a specific order.
- Micro Surfacing is a newer process being used by the county so Mike explained what it is and the benefits. Both Micro Surfacing and Asphalt Overlay are used to re-surface the road. The condition the road is in may determine which one is used. Chip sealing is done to seal up the roads and keep moisture from getting in and causing the roads to break up. Double chip seal provides a longer lasting finish for a road.
- The cost for each category was mentioned. As prices are increasing, Mike said he factors in the increase in price of supplies and use of contractors into his calculations, but they subject to the economy's inflation. Comparison of "Life Expectancy" of the road processes were also discussed.
- Mike then started going through the 5-Year Plan for Yankton County using handouts and maps that showed the work planned for each year. Larger maps were also at the front of the room to look at. The handouts list all the roads up for repair. Mike discussed all the roads to be worked on for each year. He discussed the different roads referencing the spreadsheets and the maps. He went through each year.
- The category of work assigned for the roads fell into basic groups: Double Chip Seal, Overlay, Microsurfacing and Chip Seal. Mike explained the order used for completing road repair with these categories

Bridge Repair/Replacement

- Mike presented a map and spreadsheet for the bridge work to be done. The spreadsheet shows the type of project work assigned to each bridge and an approximate cost of removal or replacement of the bridge. Stone Church Bridge (68-043-023) is still on the list due to the high cost of replacing this bridge.
- Federal aid for the replacement of Fleeg's Bridge (68-156-182) will be needed due the cost of this project.
- A list showing the condition of each bridge using a sufficiency rating of all the bridges and type of road they are located on was next. This list is continually being updated to reflect which bridges still have a load limit. The number of bridges to upgrade is considerably shorter.

Additional Comments:

- Wanda opened the meeting up for further public comments. Comments on 294 St were made in regards to the dust and when it would be hard surfaced. This is scheduled to be done after the state completes SD Highway 46. The traffic resulting from SD Highway 46 causes more traffic to go to other roads with 294 being one of them.
- The budget for the highway was discussed. The funds the county received a couple years ago are slowly being used up. John said that they are looking at other avenues for raising more funds to cover costs and possible future developments within the county. Mike said he tries to keep the budget in a certain range if possible. John said it's like spending the same amount of money, but each year less miles can be done because costs have gone up.
- Wanda asked about closing the meeting. Dan moved to close and John seconded.
