 - g. The producer, or agent acting on behalf of the producer, shall inspect the land application equipment, land application sites and irrigation equipment, if used, on a daily basis while land application of process wastewater or manure is occurring. This inspection is to ensure that the land application equipment is not leaking and runoff from the land application site is not occurring. If a discharge or leak is found where process wastewater or manure is reaching any surface waters of the state, flowing onto property not owned by the producer, or not included in the nutrient management plan, the producer is responsible for taking immediate steps to stop the discharge or leak and report the leak to the county zoning office, state DENR and the affected landowner. The producer shall keep documentation of these inspections so the Zoning Administrator can review them upon request or during an inspection
